#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Baxter et al. (5,407,854).

Baxter et al. teach in figure 4 and related text a semiconductor device, comprising:

a unitary and non-layered semiconductor substrate 400 comprising a thin portion 405 that is thinner than adjacent portions of the semiconductor substrate, and a recessed portion formed below the thin portions;

wherein the etching rate of the thin portion is slower than that of the surrounding portions of the semiconductor substrate (since a dopant is infused in the thin portion), and

at least one through hole is formed in the thin portion that extends from the recessed portion, and entirely through the thin portion to the upper surface of the thin portion 405.

Art Unit: 2811

## Claim Rejections - 35 USC § 102/3

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Baxter et al.

Baxter et al. teach in figure 4 and related text substantially the entire claimed structure, as applied to claim 1 above, except a thin portion is formed by means of a selective oxide film.

The claimed limitations of a thin portion being formed by means of a selective oxide film are process limitations which would not carry patentable weight in this claim drawn to a structure, because distinct structure is not necessarily produced.

Note that a "product by process" claim is directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ 15 at 17 (footnote 3). See also In re Brown, 173 USPQ 685; In re Luck, 177 USPQ 523; In re Fessmann, 180 USPQ 324; In re Avery, 186 USPQ 161; In re Wertheim, 191 USPQ 90 (209 USPQ 554 does not deal with this issue); and In re Marosi et al., 218 USPQ 289, all of which make it clear that it is the patentability of the final product per se which must be determined in a "product by process" claim, and not the patentability of the process, and that an old or obvious product produced by a new method is not patentable as a product, whether claimed in

Art Unit: 2811

"product by process" claims or not. Note that the applicant has the burden of proof in such cases, as the above case law makes clear.

#### Response to Arguments

Applicant argues that Baxter et al. do not teach at least one through hole extends from the recessed portion, and entirely through the thin portion to the upper surface of the thin portion.

Baxter et al. teach in figure 4 a thin portion 405 having one upper surface which coincide with the lower surface of layer 401. The at least one through hole extends to said one upper surface of the thin portion. Therefore, Baxter et al. teach at least one through hole extends from the recessed portion, and entirely through the thin portion to the upper surface of the thin portion, as claimed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ori Nadav whose telephone number is 571-272-1660. The examiner can normally be reached between the hours of 7 AM to 4 PM (Eastern Standard Time) Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Loke can be reached on 571-272-1657. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
